

SWE UCR

Oct 2020

EVENING WITH INDUSTRY

Evening With Industry (EWI) is an event that provides engineering students with the opportunity to network with industry professionals. Golden Se and Himani Thakkur, Professional Development Chairs, hosted this year's virtual EWI.

Companies like Abbott, Campos EPC, HRL Laboratories, Medtronics, SoCal Gas, and many more joined us.

SWE and BMES co-hosted multiple Biomedical Q&A sessions.

GENERAL MEETINGS

This month, we had our first (virtual) general meeting. SWE officers and members introduced themselves. Officers talked about various events that will be taking place during the school year, like Evening with Industry (EWI), Research Networking Night (RNN), Bourns Science and Engineering Day (BSED), and many more. They also talked about the ways to get involved with SWE, such as Task Committee, BSED Planning Committee, Socials, Team Tech, etc.

The image shows a video conference interface. In the top left corner, the SWE logo is displayed with the text "Society of Women Engineers" and "University of California, Riverside". To the right, the date "October 21st 2020" is shown. On the right side of the screen is a grid of participant video feeds. The participants are identified by their names: Catherine Stone, Nithya Ramesh, Lizzy Sweeten, Michael O'Dea, Alyina Ferranc..., Valerie Ly, Melinda Chiao, Chloe Georgiou, Cammy Ngo, Jannette Siahon, Mariam Razak, Madhumitha Sent..., Angela Kim, and Sarah Montes D... Each participant has a small red "X" icon next to their name. A large graphic of a woman flexing her bicep, with the text "SWE Can Do It!" above it, is overlaid on the bottom left of the video feed area.

2nd General Meeting:

Motivation on an
Online
Environment

Our second general meeting was about online learning. Officers and members shared various tips and techniques for time management, productivity, and good mental health.
