

# society of women engineers at ucr

2019  
recap

# RESEARCH NETWORKING NIGHT

November 21, 2019

Research Networking Night is an annual event held during the fall quarter and organized by the academic development co-leads. This year, Natalie and Himani organized the event which allows undergraduate students to network with professors and graduate representatives from various STEM related disciplines. This year, a total number of twenty one professors pitched their research to students. Over dinner, students conversed with professors to learn more about the benefits of research and learn about specific labs with open positions. The event was divided into two sessions, allowing students to rotate tables and engage with more than one professor.

# LAST FALL GENERAL MEETING

November 25 2019

The last general meeting of the quarter was all about self care! As finals week approached, SWE wanted to help out by providing a fun space to relax and remind students that it is just as important to take care of one's mental and physical health. Students got to choose face masks and mini lip balms, and participate in a raffle to win some SWE swag!

# OFFICER SPOTLIGHT

## Alondra Vazquez : Vice President

3rd year  
Computer Engineering

### *when did you join swe at ucr?*

I was a general member throughout my freshman year, and got more involved after volunteering for Bourns Engineering Day in 2017.

### *other ucr org involvement*

I'm also involved in the ACM-W chapter on campus, the Rose Hack planning committee, and PODER, an organization that educates people about the immigrant community.

### *what's your favorite part about being involved in swe?*

I love the fact that through SWE, I have the opportunity to meet a variety of women studying to be engineers, and empowering each other. I also love being able to work in events to teach the next generation of engineers!

### *future plans and dreams*

I am still trying to figure out my ideal job and my passions besides helping people. For now, I want to enjoy my time in college and take advantage of the opportunities given to me.

### *hobbies*

I enjoy watching movies, learning about the world through YouTube. I also love tea!
