

A large, irregularly shaped circle composed of three overlapping colored regions: yellow on the left, brown in the center, and purple on the right. Each region contains a white plus sign (+). The word "SWE" is written in white capital letters inside the yellow region, and the word "UCR" is written in white capital letters inside the purple region.

# ROSE HACK

## SWE x WINC

Rose Hack 2020 was our second annual overnight hackathon organized by members of SWE and WINC (Women in Computing). It is a free event open to both high school and college students to compete in a software design contest. The objective is to design a program with no limitations on theme or project type! Several company sponsors also joined us and offered workshops and lots of goodies for participants! A big thank you to our sponsors including Oracle, MLH, Google, .XYZ, to name a few. Hackers and volunteers worked hard and late into the night, so Rose Hack organizers made sure to keep everyone awake with catered food, boba, and fun activities/games to give students a break! The event was wrapped up Sunday morning as participants submitted their projects and the winners were announced at the closing ceremony.

Rose Hack year 2 proved to be very successful and very fun! Thank you to all the organizers, volunteers, and sponsors who worked so hard to make Rose Hack possible!

# EVENING WITH INDUSTRY

EWI is a special event for SWE at UCR because it allows our organization to directly connect students with industry which is an important step for students looking to apply skills taught in classes to hands on work.

Evening With Industry is a networking event planned and hosted by our Academic Development co-chairs Cristina Lawson and Isis Dumas. EWI provides the opportunity for engineering students to speak to industry professionals on a more personal level over dinner. Companies such as NASA JPL, Medtronic, Rejoule, LADWP, US Department of Defense, and Navy joined us.

# GENERAL MEETINGS

This month was all about preparation for our members! We offered a coding workshop hosted by professor Mariam Salloum to get students ready for Rose Hack. Professor Salloum went over the basics of Python and Github and showed some of the many uses of these programming platforms.

Our second general meeting was an officer panel as we look forward to February officer interviews and elections! Students had the opportunity to ask current officers about their positions and commitments as SWE officers.
