ROSE HACK

By the UC Riverside Chapters of
Women in Computing
&
Society of Women Engineers

What makes us DIFFERENT

Rose Hack is the Inland Empire's first women-centric hackathon hosted by Women in Computing (WINC) and Society of Women Engineers (SWE) at the University of California, Riverside. Rose Hack welcomes undergraduate and high school students from all over the world to participate. Our mission is to encourage individuals from underrepresented groups in STEM to gain experience, build confidence, and create a strong network together.

ABOUT US

We're growing every year at a rapid pace. In only two years, our impact and commitment to diversity is reaching hundreds. Just look at our numbers from last year!

650+ applicants

40+ completed projects

35+ sponsors

250+ participants

25+ mentors

20+ organizers

Why should you SPONSOR?

recruit

You will meet a select group of over 200 bright STEM students from around the world who are innovating ideas for technological development and platform growth. You will also have a chance to learn more about our participants and organizers and will establish connections that last beyond the hackathon.

inspire

Women are twice as likely as men to leave STEM majors during their time in university. You have the opportunity to impact the careers of women and other underrepresented groups by speaking to and encouraging participants at Rose Hack to pursue a career in STEM.

promote

This is the perfect opportunity to market your brand, mission, and product to upcoming developers and engineers. Rose Hack ensures that our sponsors get well-deserved recognition for their contributions across our various social media and community platforms.

What your sponsorship SUPPORTS

• A key role in inspiring and diversifying the next generation of hackers
• Provide tools for a more interactive virtual experience
• Awards for the top performers
• Memorabilia for participants
